Professional Summary

Analytical and results-driven professional with a strong foundation in Computer Science and Artificial Intelligence. Highly focused on Data Analytics, transforming complex datasets into clear, actionable business intelligence solutions. Proven experience as a Freelance Data Analyst on Upwork and a solid background in delivering practical mentorship programs at Barakat Analytics and partnered tech academies. Equipped with advanced certifications in Data Analytics, Power BI, and database engineering.

Education

Bachelor's Degree in Computers and Artificial Intelligence

FCAI, Bani Suef University

Specialization: Computer Science and Artificial Intelligence

Professional Experience

Freelance Data Analyst | Upwork | Sep 2024 – Present

- Develop dashboards, reports, and business intelligence solutions tailored to client needs.

Data Analyst | Micro1 | JUN 2026 – Present

- Analyzed complex datasets to extract actionable insights, directly supporting data-driven decision-making.
- Collaborated closely with cross-functional teams to identify data trends, optimize internal processes, and improve overall data accuracy.

Technical Mentor | Al-Walaa Academy for Science & Technology - Egypt

2025 - Present

- Deliver engaging lectures and workshops on data science fundamentals, bridging the gap between academic theories and industry requirements.

Technical Mentor | Future Academy - Egypt

2026 - Present

- Mentor students in advanced Excel, SQL, and BI tools, evaluating capstone projects to ensure job-market readiness.

Technical Mentor | Barakat Analytics - Egypt (Remote)

Nov 2025 - Present

- Founded an educational platform dedicated to developing practical data analytics skills for students and professionals.
- Design and deliver comprehensive courses covering Data Analysis, Power BI, SQL, and Python through hands-on, real-world projects.

Licenses & Certifications

- Data Analytics Freelancing Program - ITIDA Gigs (Jan 2026)
- Data Analysis (Data Types, Preparation, Visualization) - eyouth (Dec 2025)
- Data Analysis Using Power BI - eyouth (Dec 2025)
- Data Analysis Using Excel - eyouth (Dec 2025)
- Data Analysis Awareness - eyouth (Dec 2025)
- Data Analytics Summer Training - National Telecommunication Institute (NTI) (Sep 2025)
- Data Analyst Certification - Microsoft (Aug 2025)
- Digital Egypt Pioneers Program (DEPI) - Power BI Engineer - MCIT, Egypt (May 2025)

Notable Technical & Data Projects

Movies Dataset Explorer & API Integration

- Integrated the TMDB API to fetch, process, and analyze real-time data regarding trending and top-rated movies.
- Applied advanced search and filtering algorithms to manage complex datasets for end-users.

E-Commerce Data Management App

- Engineered the data flow and backend integration for a comprehensive e-commerce platform using RESTful APIs.
- Utilized Postman to test data endpoints rigorously, ensuring seamless data retrieval and state management.

AI Chatbot Data Pipeline

- Built an intelligent conversational system leveraging Google's Gemini API to process user queries and return accurate academic data.
- Implemented Clean Architecture principles to manage the data, domain, and presentation layers efficiently.

Technical Skills

- **Data Analytics & BI:** Power BI, Microsoft Excel (Advanced Pivot/Formulas), Data Visualization, Dashboard Metrics, Data Cleaning
- **Database & Engineering:** SQL (PostgreSQL, MySQL, Oracle, SQL Server), ETL Processes, Data Pipelines
- **Programming:** Python, C++, Dart
- **Soft Skills:** Mentoring & Leadership, Critical Thinking, Problem Solving, Analytical Mindset, Effective Communication

Languages

- Arabic: Native
- English: Full Professional Proficiency
